Urban transportation is a complex and ever-evolving field that plays a vital role in shaping the fabric of our cities. From the bustling streets of New York City to the sprawling suburbs of Los Angeles, transportation systems are the lifeblood of urban communities, enabling people and goods to move efficiently and sustainably.

The Geography of Urban Transportation, 4th Edition provides a comprehensive and up-to-date analysis of this critical topic. Written by leading experts in the field, this definitive text offers a comprehensive examination of the geography of urban transportation, from its historical roots to its current challenges and future prospects.

Key Features

- In-depth coverage of the latest trends and best practices in urban transportation planning, policy, and management.
- Case studies from around the world that illustrate the real-world applications of urban transportation principles.
- Original research that provides new insights into the complex relationships between transportation, land use, and economic development.
- Full-color maps, graphs, and illustrations that bring the text to life and make complex concepts easy to understand.

Benefits for Readers

- Gain a deep understanding of the geography of urban transportation, from its historical origins to its current challenges and future prospects.
- Learn how to plan, design, and manage urban transportation systems that are sustainable, efficient, and equitable.
- Be informed about the latest trends and best practices in urban transportation policy and planning.
- Develop the skills necessary to address the complex challenges of urban transportation, such as congestion, pollution, and climate change.

Target Audience

The Geography of Urban Transportation, 4th Edition is an essential resource for:

- Students in urban planning, geography, transportation engineering, and public policy
- Practitioners in transportation planning, engineering, and management
- Policymakers and government officials responsible for transportation policy and planning
- Researchers and scholars interested in the geography of urban transportation
