What is Scientology?

Scientology is a cult that was founded in 1954 by L. Ron Hubbard. Hubbard claimed that Scientology is a science of the mind and spirit, and that it can help people achieve spiritual enlightenment.

Scientology's teachings are based on the idea that humans are spiritual beings who have forgotten their true nature. Scientologists believe that they can regain their spiritual enlightenment by undergoing a series of expensive and time-consuming courses.

Scientology has been criticized for its high fees, its authoritarian leadership, and its use of mind control techniques.
